

How Does Energy Affect Motion?

When you pull back on the bow, you are storing potential energy. When you let go, the energy is being put into the arrow.

When you pull back on the bow, you are storing potential energy. When you let go, the energy is being put into the arrow.

3, 2012

Friday

They had many exciting adventures
and they met many fascinating
people. Noah, Jacob and Max met
Michael Jordan at his fancy
home. Ja and Hannah looked
down upon Paris from the Eiffel
Tower and Alice went

How Does Energy Affect Motion?

How Does Energy Affect Motion?

Energy is the ability to do work or cause change.

Energy can be stored or transferred.

Energy can be converted from one form to another.

Energy is needed for motion.

Energy is needed for work.

Energy is needed for heat.

Energy is needed for light.

Energy is needed for sound.

Energy is needed for electricity.

Energy is needed for magnetism.

Energy is needed for nuclear energy.

Energy is needed for chemical energy.

Energy is needed for biological energy.

Energy is needed for mechanical energy.

Energy is needed for thermal energy.

Energy is needed for electromagnetic energy.

Energy is needed for gravitational energy.

Energy is needed for elastic energy.

Energy is needed for potential energy.

Energy is needed for kinetic energy.

Energy is needed for total energy.

Energy is needed for conservation of energy.

Energy is needed for the first law of thermodynamics.

Energy is needed for the second law of thermodynamics.

Energy is needed for the third law of thermodynamics.

Energy is needed for the zeroth law of thermodynamics.

Energy is needed for the laws of physics.

Energy is needed for the laws of chemistry.

Energy is needed for the laws of biology.

Energy is needed for the laws of geology.

Energy is needed for the laws of astronomy.

Energy is needed for the laws of earth science.

Energy is needed for the laws of environmental science.

Energy is needed for the laws of social science.

Energy is needed for the laws of human science.

Energy is needed for the laws of psychology.

Energy is needed for the laws of sociology.

Energy is needed for the laws of anthropology.

Energy is needed for the laws of linguistics.

Energy is needed for the laws of history.

Energy is needed for the laws of philosophy.

Energy is needed for the laws of art.

Energy is needed for the laws of music.

Energy is needed for the laws of dance.

Energy is needed for the laws of theater.

Energy is needed for the laws of film.

Energy is needed for the laws of television.

Energy is needed for the laws of radio.

Energy is needed for the laws of the internet.

Energy is needed for the laws of the future.
