

After they get back Miss Griffin
asked the class to decorate the class room
for Valentines day first she had us
make conversation hearts out of
clay then they painted the hearts
pink and red at we wrote
notes on them
took them home

The Periodic Table

Atomic Weight 226
Density 8.96 g/cm³
Melting Point 1083 °C
Boiling Point 1737 °C

Radium was widely used in self-luminous dials and watch faces, and too many watch factory workers had died of it. This unique watch is still quite radioactive, and will stay that way for thousands of years.
